

Luck “O” The Draw (Custom “off-elbows” bench rifle shoot)

Targets – Task Force Targets, Model V/C/03

Number of Shots – 3

Time Limit – 2 minutes

Distance – 100 meters

-Shooter starts by drawing two cards from a deck of 20 cards, numbered from 1-5, to determine which targets they must shoot

-Upon the command “FIRE,” the shooter (shooting from the bench, off-elbows) must shoot one round into each target, corresponding with the numbers indicated on the cards they drew and then total those two numbers to determine which target must be shot third. (eg: if the shooter draws a 3 and a 2, the shooter must shoot the #3 target, the #2 target and the #5 target)

-The largest targets (#5 & #6) are worth 1 point each, while the smallest targets (#1 & #10) are worth 5 points. The other targets are worth 4, 3 and 2 points, respectively, depending on size

-This is a “Best Score” event and the shooter with the highest total score wins

-“Luck” comes into play, as not all card combinations are of equal point value
